Photography and Blog assistance for the technology tortured artist

Blog Set Up and photography management: A blog service is chosen and set up. Photo management through Picasa is added so a manageable size image can be added to your blog. A Gmail account is set up for use with these two programs.

**\$12** per hour for set-up(average 5 hours)/**\$10** a month for upkeep if needed as necessary

Basic Computer/Internet Tutorial: Watch the internet be used, take notes, then do it yourself. Ask questions as you go. Glossery and printed notes included.

**\$10** per hour (average 4 hours)

Photography Management (A La carte): Too many photos on your digital camera that you don't know what to do with? A couple of free programs can help you organize, enhance and share your photographs.

**\$10** per hour (average 2 hours)

Additional Information:

- Blog set up and photography storage can be done on Mac or IBM computers.
- Bartering is an option that can be discussed
- Operating System updates and minor computer maintenance (clean up) may need to be performed in order to install new programs.
